RE: OLFactor

After over 90 years in the carpet and rug cleaning business, we are hesitant to change from products we know and trust. Nevertheless, we are always on the lookout for new products to help us do our job better and easier. After a six month test period, we can safely say that OLFactor is a new product that meets and exceeds our high standards.

The problem of cat urine has always frustrated us to varying degrees. OLFactor is the first product we have ever used that has solved all but the most severe contamination situations. It is unsurpassed in its ability to neutralize & encapsulate odor causing molecules for easy flushing and extraction. Full strength injection of OLFactor in underlying pad has produced many happy customers.

An additional benefit has been its powerful action on greasy restaurant carpets. Used in an extractor, as a booster, or as a prespray, results have been excellent.

As a spotting agent, OLFactor has proved to be a great all purpose spotter and is the best product we have used on those tough air filtration lines.

We highly recommend OLFactor. It has become a very welcome addition to our business.

Sincerely,

A handwritten signature in black ink, appearing to read "David A. Hoffman", with a long horizontal flourish extending to the right.
