

May 19, 2010

Dear Larry,

What a LUCKY day it was when I met you at the Realtor Convention in Orange County earlier this month.

As promised you dropped a bottle of Enviro Clean OLF factor at my office for me to try out in my foyer. As I mentioned to you when we met, I have (or had, she has since passed away from cancer) a sick cat that insists on urinating in my front foyer so the very first smell you get when you enter my home is that awful pungent smell of cat.

I have tried EVERY product on the market, I have bleached the walls, continually cleaned the carpets and even removed the carpet in hopes that the smell would disappear. Unfortunately, the urine had soaked right into the plywood subfloor right by the front door. I was always SO embarrassed to have people over.

You can only imagine how excited I was to hear you say that the OLF factor product would take the smell away from the wood and keep the pet from soiling the same area again because the OLF factor actually breaks down the urine so it is no longer present rather than mask the odor.

The instructions were so simple: with a clean paint brush, simply brush the full solution on to affected area and let dry. WELL, let me tell you, within 5 minutes of applying the OLF solution, the odor was gone and what was left was this wonderful scent that I wish was available in a plug-in air freshener.

Your product is TOTALLY AMAZING and it continues working every day. No more cat accidents in my foyer and I am no longer embarrassed to welcome guests into my home. I have given your name and number to others that I meet. And as a Realtor this product will be most helpful to potential customers who are plagued with the same problem.

Thanks ENVIRO CLEAN!!

Yours,
Kelly Campbell
